**Stereo Cabinet**

**Cedar Hall Tree**

**Cedar Curio Cabinet**

**Poker Table**

**Knife Display Case**

## Restoration Projects:

**Vintage Stereo Cabinet** – This 1947 stereo cabinet required lots of sanding, a new finish and new top to restore it to a brilliant new look.

**Antique Vanity Desk and Bench**-This old vanity came in numerous pieces. It required rebuilding the drawers and bench, retightening the legs and refinishing and painting the entire piece to get it fully restored.

**Antique Rocking Chair** - This century old rocker required a new leather seat, full spindle tightening and a reconstructed rocker to get it fully restored.

**Dining Table** - This family heirloom was severely weathered. It required a full sanding, stain and new finish to restore this oak table to a new life.

**Vintage Dining Room Chairs** – These five dining chairs had been severely damaged from being left out in the weather for years. After removing the finish, sanding, tightening all the spindles we reconstructed and reupholstered the seats to fully restore the chairs.

**Old Black Vanity** – After some sanding and repainting this old vanity was restored to a very nice antique look.

**Coffee Table** - The table top was warped from water damage. A new top and it was restored like new.

**Sofa Table** - The table had water damage to the top. I was able to refinish it and bring back to life.

**Cabinet-** The 1930's sheet music cabinet had numerous gouges and water damage. I restored the 4ft. cabinet to original condition.

**Dining Table** – A dark dining table with numerous deep scratches in the top. I tightened the chairs and restored the table top to its original finish.

**End Table** – The oak end table with a veneer top had extensive water damage on it. Restored the top as it now looks like new. .

**Chair** – This little chair was found in a dumpster. I rebuilt the chair and painted it to look old and added a padded seat.

**China Cupboard** – This vintage kitchen cupboard was in miserable shape, having been repainted several times with annoying colors. I stripped and repainted this old kitchen cupboard, added knob knobs, hinges and distressed it to look old.

**Dry Sink** – Restored this 1930's dry sink as it had been abused and left in a corner of an outside shed.

**Dresser** – Restored this 4'h x 18"w antique chest of drawers to its original condition.

**Curio cabinet** - This old kitchen cabinet was in bad shape, having been left in an old shed. I stripped and repainted this old 5' high kitchen cabinet, added a new back and shelves and stressed it to look old.

**Small Table** - As shown, this oak veneer table top had lots of damage to the top. I was able to restore the top to its original look.

**Tiny Table** - This tiny drop leaf end table was built by German prisoners during WWII. It was found in pieces in terrible shape. Restoring it to its original condition.

**Two Tone Curio** – Stripped and repainted this old 6' high kitchen cabinet.

## Client Testimonials:

*“Thank you so much for the beautiful display cabinet. It is Perfect!!*

- Pat P. – Phoenix, Arizona

*“You saved my oak kitchen table. The water damage was so bad I was afraid I would be forced to trash it. It’s beautiful again”*

- Barb L. – Boise, Idaho

*“This is quality workmanship. Thanks for your excellent work.”*

- Cal S. – Weiser, Idaho

*“The cutting boards were perfect and look great. I was lucky to find you”*

- Anita T. – Nampa, Idaho
